PROJECTS

Movie Recommendation System

Developed a robust movie recommendation system using machine learning algorithms, including collaborative filtering and content-based filtering, to deliver personalized movie suggestions. It is beautifully designed and crafted purely with HTML, and CSS

Online Car Rental System

Implemented an Online Car Rental System using DBMS to manage bookings, customer data.

Image Classification

Developed an image classification system using deep learning techniques with TensorFlow, enabling accurate real-time categorization of images.

CERTIFICATES

- Front-end development (from Great Learning)
- Web Development (internpe)
